## THROUGH-FLOOR LIFTS

---

The complete lift solution for seamless  
access between floors.

# DESIGNED FOR SAFETY, BUILT FOR PERFORMANCE.

Every Quinn lift is crafted with precision engineering and a commitment to long-term performance. From robust components to advanced safety features, each unit is designed to deliver dependable, seamless movement day after day.

Built to support a wide range of access requirements, Quinn lifts provide confidence with every ride - offering smooth operation, secure transitions, and the peace of mind that comes from equipment you can trust.

- ✔ NZ-based support & service
- ✔ Trusted by homeowners, builders & architects nationwide
- ✔ Custom-built options available
- ✔ Expert advice from start to finish

## ENHANCING ACCESS BETWEEN FLOORS

Our through-floor lifts provide a practical and elegant solution for moving safely between levels inside a building. Designed to integrate seamlessly into interior spaces, they offer smooth and reliable vertical access without the need for major structural changes.

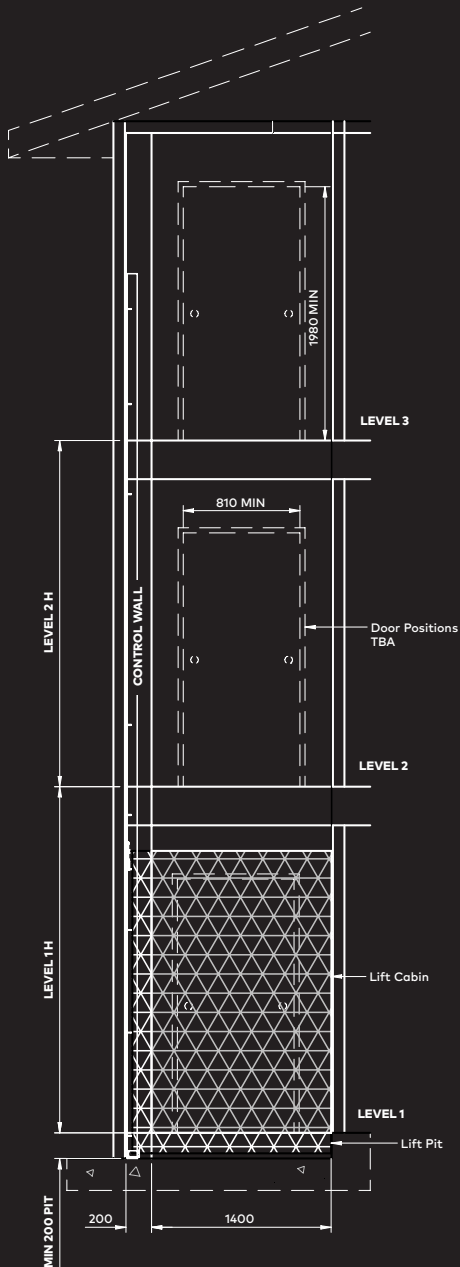

Suitable for both residential and commercial environments, Quinn through-floor lifts deliver safe, stable and convenient access between floors - helping remove barriers and improve accessibility throughout the building.

These lifts provide a smooth and secure ride, making them ideal for wheelchairs, mobility devices, or anyone who prefers a safer and more comfortable alternative to stairs.

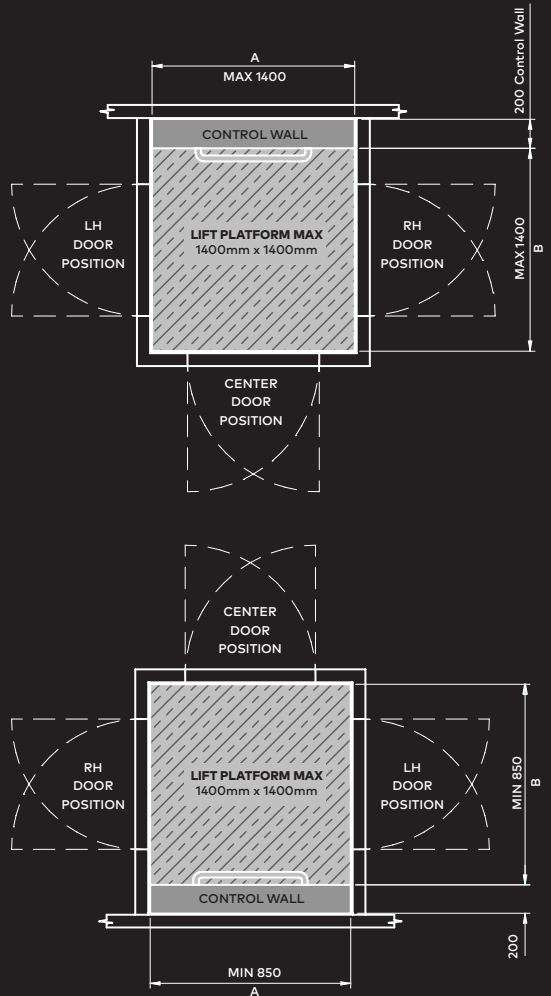

### WHY CHOOSE A QUINN THROUGH-FLOOR LIFT?

- ✓ Manufactured in NZ
- ✓ Designed for residential & commercial buildings
- ✓ Compact design to suit modern interiors
- ✓ Smooth and quiet operation
- ✓ Reliable and safe performance
